

What Makes A Pilot Tick

Aviation Physiology includes the effects of the environment, medications and physiological conditions that may compromise the safety of a flight. The speaker is a medical doctor, military flight surgeon and pilot. He has a detailed understanding of potential adverse consequences from normal operations through numerous accident investigations and through personal monitoring of pilots under various flight stressors. This presentation is offered to enlighten pilots of the importance of the IMSAFE personal checklist. Click the link below and register TODAY!

Directions: Park in the parking lot at the flight school. Enter through path with the wooden fence with the sign that says "Flight Training Here." The entrance to the building is on the east side.

A message from the National FAASTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov!
